

ACCESSORIES

Lockout Bracket

Lockout Bracket with 304-type stainless steel wallplate

Cat. No. 40483

Ideal for any application where it is necessary to prevent unauthorized use of a toggle switch. Turn lockout bracket with identification letter 'T' upright to prevent turn on; turn upside down to prevent turn off. Can be used with any standard toggle wallplate and toggle switch.

Lockout Bracket Kit with bracket made of 304 stainless steel, two tamperproof screws and spanner bit.

Cat. No. 40486

Switch Guard

Wallplate not included

Cat. No. 40460

Switch Guard mounts right over a standard toggle switch and can protect against accidental turn on or turn off. Made of 304-type stainless steel.
